**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-14 are rejected under 35 U.S.C. 101 b because the claimed invention is directed to non-statutory subject matter.
3. The claimed inventions in claims 1-14 are directed to non-statutory subject matter.

Claims 1-14 fall into this category because they merely perform a gradient search algorithm. The claimed method is not directed towards the practical application but is towards data manipulation and calculations. The features of the invention that would render the claimed subject matter statutory if recited in the claim is to include speech input to the system and how it is measured and converted to the desired data. This would place the claims into a so-called "safe harbor" by requiring a physical act outside a computer (the physical input of speech and subsequent change of physical attributes thereof). Another option would be to add limitations that indicate the practical use of the resultant data in an overall system.
